LOOKING FOR THE GLOW?

WHAT IS IT?

The worldwide successful original GREEN PEEL® herbal peeling treatment helps thousands of people to get a beautiful, healthy skin - in a completely natural way. Developed by a dermatologist, provide visible and sustainable results. 3 dermatologically-developed treatment methods for successful problem solving. CLASSIC · ENERGY · FRESH UP

ABOUT THE CREATOR

More than 60 years ago, Christine Schrammek provided the foundation for the original GREEN PEEL® Herbal Peeling Treatment which helps people with various skin problems to get a clean and even skin. The basis is a mixture of eight selected herbs containing enzymes, minerals and vitamins, which are massaged into the skin. The Herbal Peeling Treatment was further medically developed and extended by her daughter, the dermatologist Dr. med. Christine Schrammek-Drusio, and is applied by aestheticians and doctors worldwide today. Varying amounts of the herbal plant mixtures allows the GREEN PEEL® Herbal Peeling Treatment to be adapted to individual skin conditions and the personal treatment goal is a regularly distributed publication that is generally about one main topic of interest to its subscribers.

LOOKING FOR THE GLOW?

IS THE TREATMENT PAINFUL?

There exist 3 methods of the GREEN PEEL® Herbal Peeling: Fresh up, Energy and Classic. During all three methods our GREEN PEEL® Herbs are massaged into the skin. Depending on massage pressure and consistency of the skin, this can involve sparkling and prickling, but no pain. At the utmost the herbal massage can be slightly uncomfortable. The main difference between the stronger method, our GREEN PEEL® Classic and the 2 softer methods are pressure and duration of massage. This can't be considered a wellness treatment, but it is well bearable.

IS THE TREATMENT AGGRESSIVE?

Is a GREEN PEEL® treatment aggressive?

No. You can tell this by the fact that your skin therapist does not wear gloves during treatment. Our Herbal Peeling is purely natural and includes neither chemical substances nor abrasive particles.

NEWSLETTER

LOOKING FOR THE GLOW?

IS THE TREATMENT AGGRESSIVE?

No. After a GREEN PEEL® treatment the skin is young and fresh. Of course this skin needs special attention.

With every GREEN PEEL® your skin becomes stronger, firmer and resistant. Metabolism is activated, microcirculation as well as the interlocking of skin layers is improved. This in turn results in the skin receiving more oxygen and nutrients. The connective tissue fibers (collagenous and elastic fibers) are activated and metabolic wastes wicked away.

IS THE TREATMENT AGGRESSIVE?

No. The strength of the skin peeling is dependent on individual condition. However, this has no influence on the effect of GREEN PEEL® Herbal Peeling. The herbs always initiate a renewal- and regeneration process in the skin.

May I not leave the house after a GREEN PEEL Classic?

No, every skin is individual. Before the treatment, it is hardly possible to predict how intense the peeling will be. With most customers the skin starts to peel on the 3rd day after treatment. On day 5, after the mandatory Beauty Finish treatment, the peeling process is mostly completed. If you prefer not to be seen in public during the peeling process, you should schedule the GREEN PEEL® Herbal Peeling treatment for a Wednesday, so the peeling process will take place over the weekend. The post-treatment will follow on Monday then and downtime (if any) is minimized.
